

GARDENING CLUB

The children this term have certainly been eager to get digging! We have found centipedes, millipedes, ladybirds, slugs, snails and incredibly long worms in our vegetable beds.

We have learnt how we can save seeds from some fruit and vegetables, and are seeing if we can grow a new crop from our saved seed.

This years crop of potatoes have now been planted thanks to the charity "Grow Your Own Potatoes" who provide primary schools with free seed potatoes.

Our spring bulbs are popping up, veg beds newly mulched and raked, deer defences built, Strawberry patch tidied and sweet forced Rhubarb already harvested.

The children are also very excited to invite friends, family and neighbours to have a look around our school allotment as part of this years Summer Fayre. Signs have been made for our plant stall and our greenhouse is full of tiny seedlings which will be ready to sell on Saturday 11th May!

After the Easter Break Gardening Club will be open to children from all years including Reception.

AFTER THE EASTER
BREAK, GARDENING CLUB
WILL BE OPEN TO
CHILDREN FROM ALL
YEARS INCLUDING
RECEPTION
